

# Respiratory Home Care Services

Our Respiratory Home Care Practitioners will assess your needs, set up your respiratory services and communicate with your physicians and family members to monitor your home care. We also network with other home care providers out of state so that if you will be traveling, we can arrange for you to continue to receive quality respiratory care.

This sheet answers some commonly asked questions about Unity Medical Center's respiratory Care Home Services. For more information, call 701-352-1620 and ask to speak with one of our respiratory care staff or talk with your doctor.

## Our Commitment

Unity Medical Center is committed to helping people with respiratory problems. We introduced this service in June 2000 and have helped many people in the area affected by respiratory problems. It is our hope that we will also help you.
